# ADMS-9
# Programming Software
# Installation Manual

The ADMS-9 programmer provides a convenient and efficient method to load the memory channels, and the set mode items to the FTM-100DR/DE with a Personal Computer.
The menu settings can be adapted to your individual operating preference and then entered and stored in your computer. You can then quickly and easily clone all the memory channels and menu settings to the FTM-100DR/DE.

Before downloading this software, please read the "Important Notes" carefully. Downloading or installing this software will be taken as indicating your agreement with the contents of the "Important Notes".

## Important Notes
